

PCS FILE
M/023/016

From: Tom Munson
To: Daron Haddock; Doug Jensen; Joelle Burns; Paul Baker; Susan White
Subject: Levan Chicken Creek Mine M/023/016

I talked with Tony Christofferson, he relayed the following information to me:

- 1.) The Forest Service had given them permission to operate on Forest Service property within the existing footprint.
- 2.) The Forest Service has not completed their review of the information submitted.
- 3.) The Air Quality concerns had been implemented which included magchloriding the road, paving, etc. and Tony Christofferson said he needed to get paperwork to them tomorrow and Air Quality would come and do an inspection.
- 4.) Tony also stated that the information submitted to the Forest Service did not change the mine plan and was mostly new maps and should not affect their approval.

I then talked with Tom Lloyd with the U.S. Forest Service.

- 1.) He stated that he was very busy and had left most of the response review go to Joel Nowak and Tom Shore, He did state that he had not given approval to mine.
- 2.) I called Joel and left him a message but no answer as of yet.

DOGM's letter of May 23, 2005 terminating the Division Directive stated they had to have Forest Service approval to mine on Forest Service Land.
